

## **Drug & Alcohol**

### **Oregon Department of Transportation 5311 Sub-Recipient Drug and Alcohol Compliance and Program Management**

#### **Oregon Department of Transportation**

RLS & Associates, Inc. (RLS) assisted the Oregon Department of Transportation's (ODOT) Section 5311 sub-recipients in achieving compliance with the Federal Transit Administration's Drug and Alcohol Testing Regulations. RLS' focus was on the history of the sub-recipient drug and alcohol programs, policies, and oversight. On-site reviews were completed for all Section 5311 sub-recipients, and applicable service agents. Upon completion of the on-site reviews RLS provided a detailed report of compliance efforts to ODOT's Contract Manager. RLS provided each sub-recipient with the tools necessary to achieve compliance, along with instructions on how the system should proceed. RLS worked one-on-one with each system until regulatory compliance was achieved. RLS' project manager conducted regulatory compliance and reasonable suspicion trainings outlining the issues found during the on-site reviews. RLS provides regulatory updates and on-going technical assistance to ODOT and all subrecipients through email and toll free telephone access.
