

NYSDOT Drug & Alcohol Program

New York State Department of Transportation

RLS is currently under contract to NYSDOT to assist their Section 5311, 5311(f) (Intercity Bus Program), 5316 (Job Access and Reverse Commute Program (JARC)), and 5317 (New Freedom) subrecipients in achieving compliance with the Federal Transit Administration's drug and alcohol testing regulations. RLS' focus is on the subrecipient's drug and alcohol programs, policies, and oversight. On-site reviews will be completed for all NYSDOT 5311/5311(f), 5316, and 5317 subrecipients, and applicable service agents. Upon completion of the on-site reviews, RLS provides a detailed report of compliance efforts to NYSDOT's contract manager. RLS provides each subrecipient with the tools necessary to achieve compliance, along with instructions on how the system should proceed. RLS works one-on-one with each system until regulatory compliance is achieved. RLS' project manager will conduct regulatory compliance and reasonable suspicion training outlining the issues found during the on-site reviews. RLS provides regulatory updates and on-going technical assistance to NYSDOT and all subrecipients through email and toll free telephone access.
