## **LOCAL INDIVIDUAL CERTIFIED BY MROCC AS A MEDICAL REVIEW OFFICER ASSISTANT**

01/31/2012

**Sean K. Oswald** recently qualified as a certified Medical Review Officer Assistant (MRO-A). Mr. Oswald is an Associate at RLS & Associates, Inc.

Mr. Oswald was certified as a Medical Review Officer Assistant by the Medical Review Officer Certification Council (**MROCC**), an independent physician-based certifying body whose MRO Assistant Certification Program identifies qualified MRO staff with the highest professional standards of expertise and skills necessary to assist physician Medical Review Officers in the evaluation of drug and alcohol test results in public and private sectors of the workplace.

The U.S. Department of Transportation, and U.S. Department of Health and Human Services, most Fortune 500 corporations and many smaller companies require employee drug and alcohol testing today. The certified MRO Assistant has been trained and, through written examination, found to be competent in carrying out the specific functions and tasks necessary to perform at a high level of competency within the drug testing and evaluation arena. **MROCC** certification provides assurance to the supervising Physician MRO, the Employer, and the Donor that the MRO Assistant duties are performed in a consistent and professional manner, ensuring integrity and confidentiality throughout the entire drug testing process.

The MROCC Board was founded in 1992 by a multi-specialty partnership among a variety of medical specialty groups -- the American College of Occupational and Environmental Medicine, the American Academy of Clinical Toxicologists, the American College of Medical Toxicology, the American Society of Addiction Medicine, the College of American Pathologists -- as well as the American Medical Association. MROCC has certified over 10,000 physicians as Medical Review Officers through its Federally-approved Certification Examination, and continues to set the highest quality of standards with its MRO Assistant Certification Program.
